

## DATA SHEET

# Polycom® RealPresence® Group 300

Breakthrough performance, ease of use, and interoperability at an affordable price

Optimized for smaller groups, the Polycom® RealPresence® Group 300 solution is ideal for small meeting rooms, huddle rooms, and offices. It features simple setup and configuration, and a compact, sleek design that is easily hidden out of sight, keeping your rooms clutter-free.

### Best-in-class experiences

The RealPresence Group Series sets a new standard for ease of use in video collaboration. The breakthrough user experience is easy for even first time users with no need for training. Backed by years of customer research, Polycom's new user interface speeds up the adoption of video communications and reduces support costs for IT administrators. Plus, breakthrough Polycom® SmartPairing™ technology makes it simple to use your own mobile device to start and manage video calls.

Drive increased adoption and cut expenses by delivering a video collaboration experience that is so life-like and enjoyable your teams will prefer it over traveling for in-person meetings. Up to 1080p60 video resolution adds a new level of clarity and realism to your business communications. This results in active users who eagerly look to add video to their daily communications, driving rapid and higher adoption, increasing team productivity, and speeding return on investment (ROI). Content can be received in up to 1080p60 quality, enhancing real-time collaboration. You easily share your content using the Polycom® People+Content™ IP application.

The sleek, compact design of the RealPresence Group 300 system allows for discreet placement and helps simplify your setup with single-cable connections for video and audio. Plus, the compact design also makes it ideal for mobile applications, whether moved to different locations within a building or outside of a traditional office.

### Unmatched interoperability

The RealPresence Group 300 solution is fully standards-based; able to connect to millions of other standards-based video systems in use today. Native interoperability with leading unified communications (UC) platforms—such as Microsoft Lync 2013 and 2010—means that video now easily integrates with the way you already communicate without adding expensive and complex gateways. The RealPresence Group Series also offers Telepresence Interoperability Protocol (TIP) support for direct connection to non-standards-based Cisco environments. Polycom's unique interoperable SVC architecture is the first to provide video calling between both existing video systems and new SVC systems. This unique approach delivers unmatched investment protection and avoids “video islands” that lock you into only calling other like systems.

### Benefits

- Polycom® VisualBoard™ technology for simple, real-time content annotation
- Breakthrough simple user interface and Polycom® SmartPairing™ to your employees can start collaborating instantly with their mobile device
- Seeing participants in full 1080p60 delivers more realistic meeting experiences that break down distance barriers with both sharp resolution and life-like motion
- Content can be received in up to 1080p60 quality and is easily shared using the Polycom® People+Content™ IP application
- Interoperable SVC delivers a great experience even on bandwidth-limited networks
- Enjoy clutter-free conference rooms with the compact design and simple digital connections for displays and content sources

## Lowest total cost of ownership

Polycom continues to lower the total cost of ownership of video collaboration by extending the benefits of H.264 High Profile to 1080p60 people and content. You experience whole new levels of realism with up to 50 percent less bandwidth.

For existing Polycom customers, RealPresence Group Series allows you to leverage previous investments in Polycom technology, including select cameras, microphones, and UC innovations such as Polycom® EagleEye™ Director and Polycom® Touch Control.
