Responding to change in the way we
work and the design of workspaces

KOMPORT doesn't have to be compromised in the configuration of many workstations in a small space. Our profiled desks with their fine, ergonomic shape will certainly help you find the right position. Deep shaped work surfaces

SERIES KOMPORT

offer ideal space for your computer screen, while the work surface area can be increased by additional, complementary units. The noise-absorbent screen panels, fitted onto the desks, help to reduce work-related noise while dividing space for work in small teams. The system is also accessorized with shelves which can be attached to the panels and desktop, providing for additional work space.

X-WORK is a new and boutique approach for the new work habitat. The steel X-framed legs present a solid and architectonic language to a

SERIES

X-WORK

high standard. This new offer brings the idea of "high touch" to the office as opposed to "high tech" presented by the steel-framed furniture of the past decade. Technology is invisibly incorporated in this design, where you can find alternative sources to dock in with your mobile phone, pc, laptop etc...

The overall design language strikes a fundamental tone by simplifying all expressions, concealing all details, and serving all contemporary needs without displaying the complexity of a configuration. It helps to create a calm atmosphere and natural aura; the touch of naturally treated wood surfaces introducing tactile elements into daily work - a quest for silent joy.

T-MEET is a meeting table series presenting various models to fulfill needs of meeting groups ranging from 6 to 20 participants. Its surface is designed in boat form to enhance the communication and dialogue of users. Table top covered either by MFC; natural wood veneer or HPL laminate.

SERIES

T-MEET

Models with natural finish sustain the natural look and feel on their cable covers as well, where the covers in laminate covered models are same as the table's legs that are made of triangular tube metal with epoxy paint. T-meet's cable management system is designed in a special way to keep cables going peacefully along the inner-legs and particular paths below top surfaces, so that each user has easy access to power plugs through cable runway tunnel.

ELEGANCE, the executive environment becomes a habitat in which several aspects live together: technology, design, work, welfare. Walnut, Ebony or Wenge, with their warmth and their values, convey a high personality to this project, enriched by an equally exclusive choice of complements and accessories. The version with top, the executive desk can accept briefs and collaborative activities, always in an atmosphere of natural prestige.

Know how to extract each day the essence that transforms a person into a true leader means passion, curiosity, determination and, above all, commitment.

SERIES ELEGANCE

This commitment requires a practical and comfortable workplace that can gracefully reflect your own personal style. Elegance by TAV is an executive office system, with clean, essential lines, perfected to the smallest detail, and made with the finest materials to give you the best working conditions, whichever side of the desk you sit at.
