

Butterfly valve, Plastic

Construction

GEMÜ 410, 417 and 423 are centric butterfly valves in nominal sizes DN 15 - 50. The valve body is made of PVC-U, the butterfly disc is made of PVDF or PP. The available seal materials are EPDM and FPM.

GEMÜ 410 has a low-maintenance corrosion-resistant plastic piston actuator. Normally Closed, Normally Open and Double Acting control functions are available.

GEMÜ 417 has an ergonomically designed handwheel with integrated locking device which prevents accidental operation.

GEMÜ 423 has a low maintenance electrical actuator with a powerful reversible DC motor with an optical position indicator and a manual override. The secondary gear in the motor, consisting of a threaded spindle with swivel lever, provides the rotation through 90°.

Features

- Suitable for inert and corrosive* liquid and gaseous media
- All medium wetted parts of the butterfly valve are made of plastic.
- The body design with male threads enables installation into pipelines without the need for additional unions
- Insensitive to high viscosity media
- Body with integrated mounting facility

Advantages

- Low weight
- Optional accessories (GEMÜ 410)
 - Stroke limiter
 - GEMÜ 1225 electrical position indicator with 2 potential-free adjustable limit switches (additional module, can be retrofitted)
- Adjustable end positions by means of microswitches (GEMÜ 423)

* see information on working medium on page 2

General technical data

Working medium	
Inert, corrosive gaseous and liquid media which have no negative impact on the physical and chemical properties of the body, disc and seal materials	
Max. perm. pressure of working medium	6 bar
Max. perm. temperature of working medium	60 °C
See data sheet "Technical Information on Plastic Body Materials"
