

Oil Circulated

Rotary Vane Vacuum Pumps

SVO 060 / 100

50 / 85 ℓ /min (50Hz)

60 / 100 ℓ /min (60Hz)

2 mbar

SVO 100

- **Reliability**

High quality material, quality control according to ISO9001, CE, mark authentication standard, automated machining facility, computer control process, etc. Guarantee standardized and accurate product manufacturing. Where operation of vacuum pump stops during vacuum work in direct coupling operation method of flange type. Check valve is installed at the suction hole in order to prevent revers-flow.

- **Environmentally safe**

Air cooling , internal oil recirculation, installed special oil sump for oil mist separator, low vibration and low noise level allows this pump to be used in any environment.

- **Easy to service**

Compact design, air-cooling and easy maintenance without oil mist separator and can be using long periods. When needed change the oil, do not need to change the other consumption parts.

- **Miniaturization**

This is simple type spindle of flange motor connect pump rotor & cylinder directly and cooling type used with cooling fan. This pump is small size and lightweight. Packing machine, Printing machine, Medical instrument and Vacuum adhesion move, etc.
