

laboratory pressure gauges class 0,1% DS 10" (250mm)

These instruments have been designed for use in laboratories, as instrument testing or in recalibration facilities or in applications where accuracy and repeatability are paramount. They should be employed with gas or fluid process media which do not attack copper alloy, do not cristalize and do not have high viscosity. The calibration certificate issued by a laboratory officially recognized by ACCREDIA (Ex S.I.T. - Italian Calibration Service) is available upon request.
