CONFORMITY

DISPOSABLE FULL BODY SUIT & ACCESSORIES - FEATURES

Fluid Resistant

Offering a light shield against penetration from everyday objects that can cause contamination to clothing underneath.

Lightweight Material

Constructed from a lightweight polypropylene fabric that is breathable and comfortable, it is great when wears move around and are able to remain flexible without any restrictions.

Hight Breathability

Breathable material to prevent hot temperature, comfortable and convenient to wear.

Eco-Friendly Product

Polypropylene fabric is more environmentally friendly than some other plastics. It's recyclable and doesn't release as many toxins as plastics. It also breaks down more quickly, taking just 20-30 years.

Accessories For More Protection

Accessories going along with bodysuit will create a barrier between the wearer and the infectious material. Gloves, protect the hands, bodysuit protect the skin and/or clothing, masks covers the mouth and nose and goggles protect the eyes.

A woman in a blue protective suit, cap, and face mask is working in a textile factory. She is focused on her task, and the background shows other workers and industrial equipment under bright overhead lights. The scene is set in a large, well-lit factory environment.

THANK YOU

ABOUT US

Company Overview:

Dong Viet Phu (DOVIP) is a Vietnamese's leading manufacture of PP (Polypropylene) based Spunbond Nonwoven Fabrics. DOVIP is a subsidiary of DonagameX which has been established since 1975. Formed in 2011, DOVIP offers high speed spunbond production process capabilities, mechanical process finishing, printing, custom slitting and excellent customer support from its 5,400 square meter factory in Bien Hoa, Dong Nai. With more than 9 years of experience in producing Spunbond Nonwoven Fabrics, we are proudly to supply high quality products to various industries locally and internationally such as textile, agriculture, medical, consumer products and packaging, etc.

Mission Statement:

To serve our customers with utmost dedication and become a leader in Vietnamese spunbond nonwoven industry by supplying high quality products to our customers at competitive prices and on time delivery. Creating meaningful work and meaningful relationship is our core principle

PP SPUNBOND NONWOVEN FABRIC EARTH-FRIENDLY MATERIAL

- ▶ At Dovic, 100% PP spunbond nonwovens are made in one continuous process. Fibers are spun and then directly dispersed into a web and formed into fabrics. Our nonwoven fabrics offer excellent uniformity at high strength in all directions. We also offer specific functions such as absorbency, liquid repellence, resilience, customized printing, laminated PE, etc., to achieve best products that match our customers' need.

INTERNATIONAL STANDARD

- ▶ At Dovip, our fabrics are produced by using PP Spunbond Nonwoven Fabric machine with double beam technology know as “SS line”. We utilize 100% PP and latest techniques to manufacture our nonwoven fabrics. This PP nonwoven fabric is the greatest blend of softness and resilience with some of noticeable features such as anti bacterias, water repellence, good permeability to air, etc.
- ▶ Our products also pass high standard test by international testing company such as TuvRheinland (Germany) and SGS (Hong Kong). We are aslo committed to continuously upgrading the internal processes, transferring knowledge to its employees to perform consistently and adapting to the best practices to the changing needs of customers.

ECO FRIENDLY MATERIAL

- ▶ Dovic PP non-woven fabric is easy to recycle and good for environment. For CO2 reduction and resource saving cases, this polypropylene non-woven fabric is called earth-friendly and easy to recycle raw material.
- ▶ Due to this feature, nonwoven fabrics are used in many industries, especially for packaging – shopping bag application. Nonwoven shopping bag has become the best alternative to replace plastic bag, which poses a hazard to the environment.

APPLICATION – SHOPPING BAGS AND CONSUMER PRODUCTS

- ▶ At Dovip, we have been supplying shopping bags to strict markets including Japan, Korea, etc.
- ▶ Beside shopping bags, we also offer other consumer products such as jacket/dress cover, clothing rack cover, etc.

APPLICATION - MEDICAL AND HEALTH CARE

- ▶ Our PP nonwoven fabrics are also used in medical industry to make face masks, surgical gowns, caps,ect. internationally and locally.

OTHER APPLICATION

- ▶ Our PP nonwoven fabrics are also used in various industries such as:
 - **Textile:** Interlining
 - **Agriculture:** Dovip UV treated nonwoven fabrics ensure protection against the sun to create microclimate for crop growth and development. It also helps to protect plants from insects, birds and harmful virus.
