# Rigel. Welcome to AdvanceLiving.

**AdvanceLiving** is our belief, our creed, guiding our company in both value and position.

Around the world, a movement is starting. Metropolises rising and growing, as lives are led at blazing speeds. With conversations evolving into powerful dialogues, people grow increasingly interconnected. More and more global citizens share bigger dreams, with less and less space. An advanced lifestyle is emerging, one that we are building a next-gen sanitary experience around.

One that maximises resource-consciousness, creating seamless convenience for the busiest of lifestyles, prioritising personal health in the most private of moments.

After all, we thrive on not just adapting to the future — but advancing it. Building a future that belongs to the truly progressive.

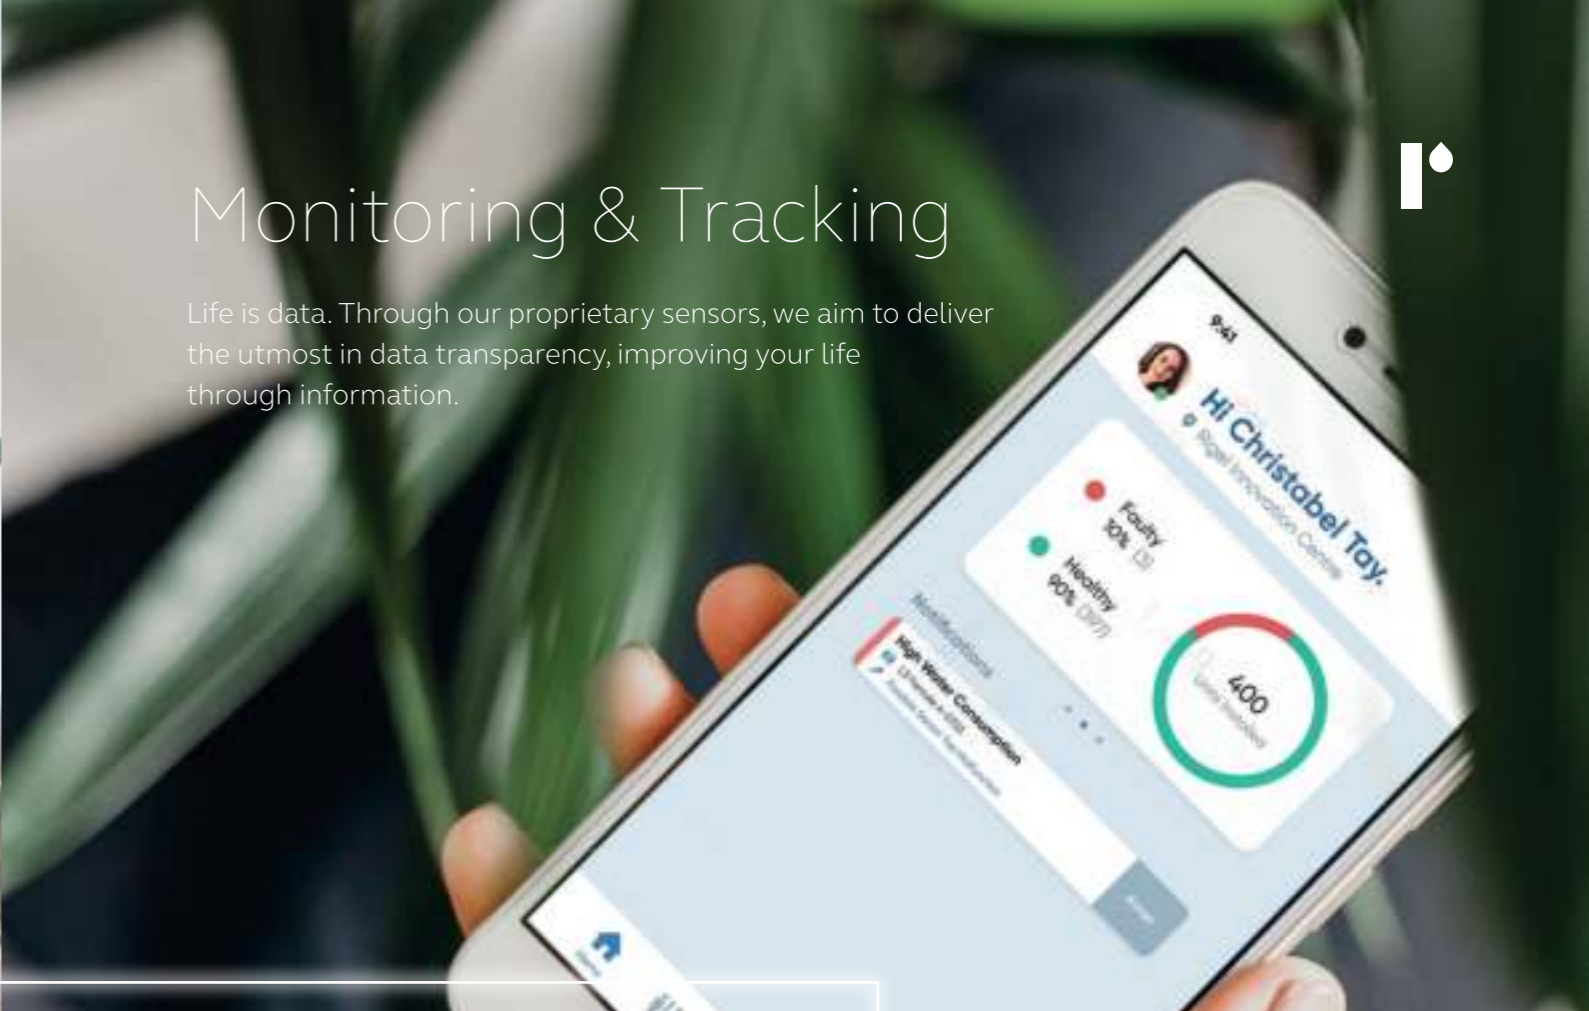

# Sustainability

At Rigel, we believe in creating sustainable products, through green processes, in order to promote an eco friendly lifestyle.

# Monitoring & Tracking

Life is data. Through our proprietary sensors, we aim to deliver the utmost in data transparency, improving your life through information.

# Advance

# Living™

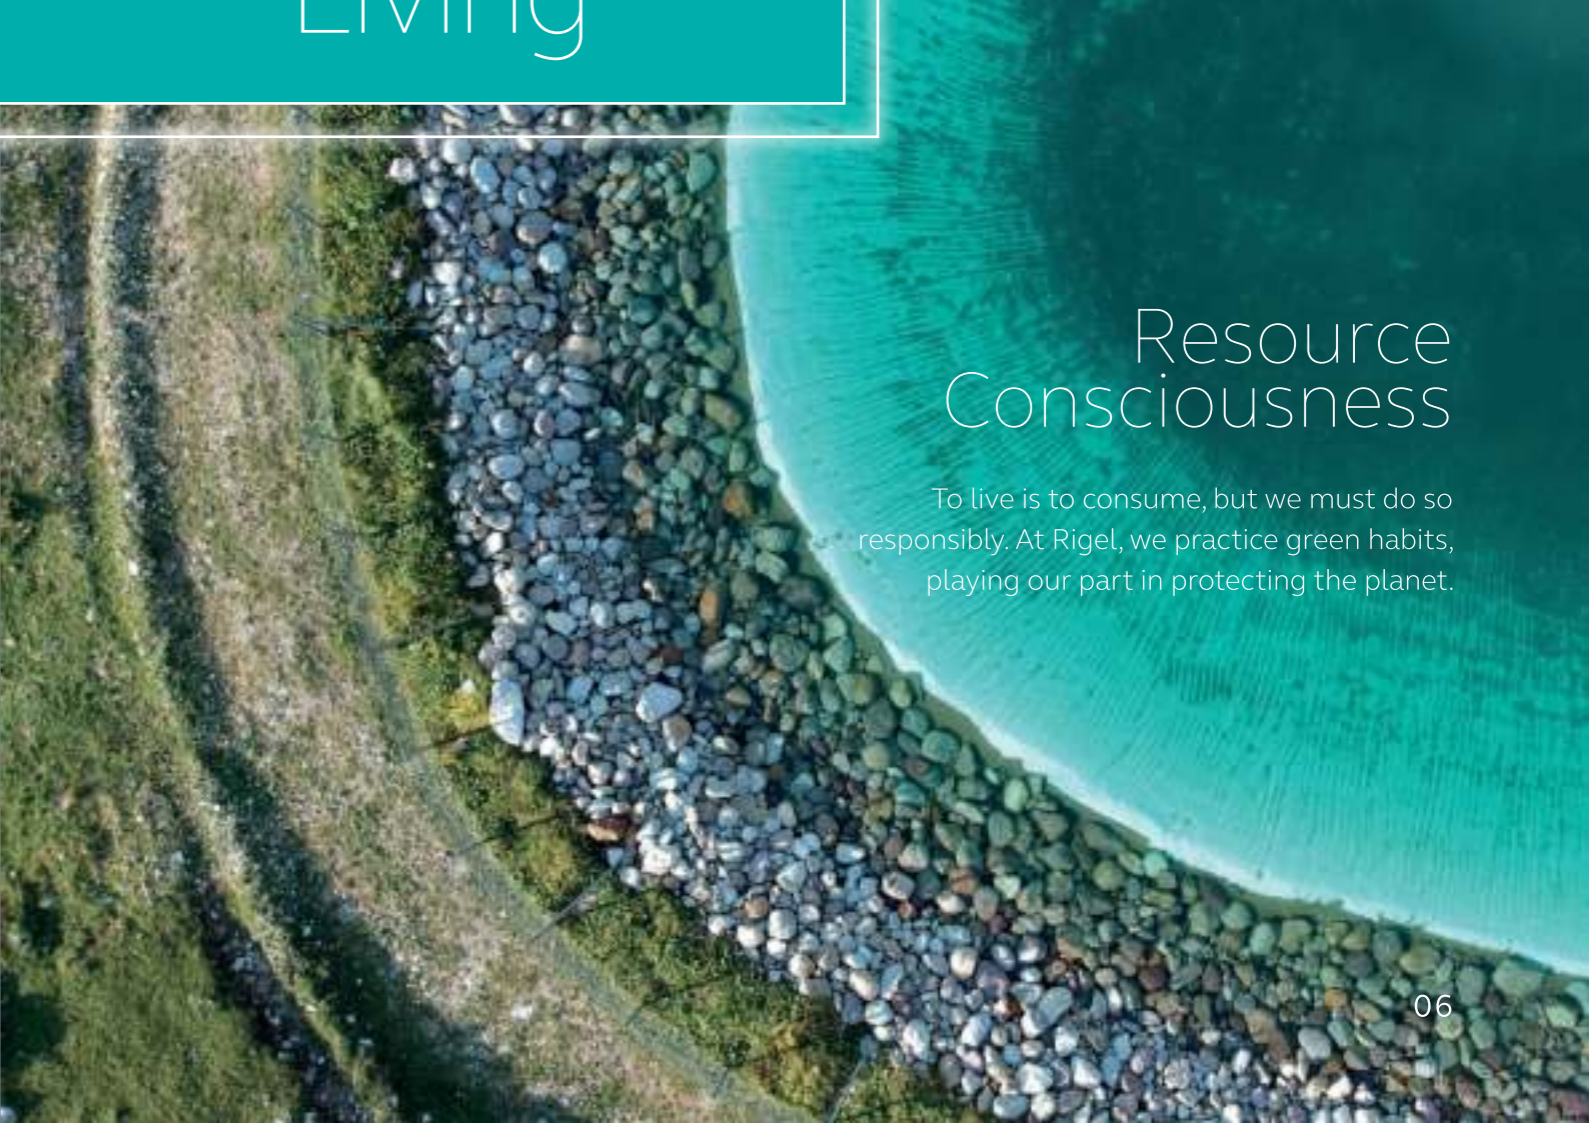

# Smart Technology

We at Rigel believe that smarter technology will promote a better quality of life, and aim to deliver to you the latest in washroom sanitary technology.

# Resource Consciousness

To live is to consume, but we must do so responsibly. At Rigel, we practice green habits, playing our part in protecting the planet.

Performance Analysis

# IoT Apps and Devices

Mobile, Web and the integrated feedback panel are part of our platforms for accessing RigellIoT data and infrastructure.

# IoT Features and Sensors

## USER TRAFFIC TRACKING

Our people counter sensor allows us to track the number of people entering or exiting a washroom.

## TEMP/HUMIDITY TRACKING

Precise and accurate all in one environmental sensor that sends humidity, temperature data to the IoT dashboard.

## AIR QUALITY DETECTION

Our sensors can detect urine or high waste concentrations as ammonia, as well as any chemicals or hazards and alert as required on the IoT dashboard.

## IoT ENABLING CONVENTIONAL MIXERS

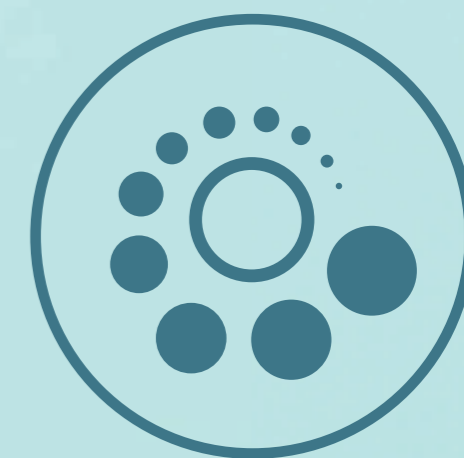

With Flowolt, conventional mixers can be converted into IoT-Enabled devices with consumption tracking and water-stop functionality.

## WASTEBIN FULLNESS TRACKING

Our modular wastebbin sensor can be mounted into any bin or container to detect fullness.

# Whirlwash

StrongLiving

Our powerful, single jet mono-cyclonic wash system, ensuring that you have a clean washroom experience with every flush.

# One swirl is all you need.

Our single jet, mono-cyclonic flushing system ensures maximum coverage.

# Consistent flow.

Our Waveguide technology ensures consistent, stable water flow.

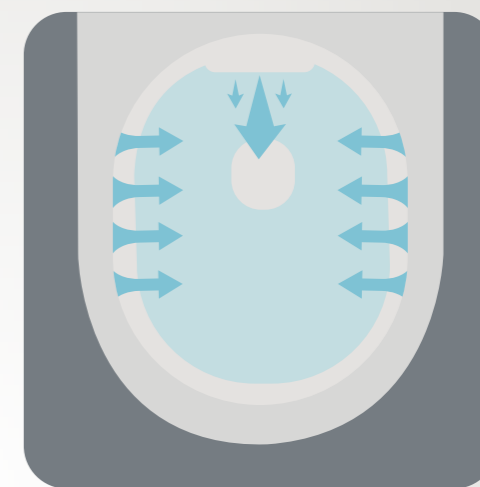

# State of the art.

Traditional washdown WCs are loud, wasteful and do not clean as effectively. Whirlwash is simpler, quieter and cleaner.

WhirlWash Technology

Traditional Washdown

# Water Saving

Our whirlwash technology is carefully calibrated, ensuring maximum flushing power at low volumes.

# ZeroRim

SimpleLiving

Our ZeroRim technology innovates on dated bowl design, delivering you an easy to clean experience with a sleek, pristine outlook.

# Cutting edge bowl design.

Traditional bowls come with rims that trap dirt, grime and disease. Rigel ZeroRim technology improves on this dated design with a seamless, rimless edge.

## Transparency.

With a cleaner edge, the profile of your bowl is cleaner than before.

## Easy to reach, Easy to clean.

With the improved rim design, cleaning Rigel bowls are easier than ever.

# PuraTech

CleanLiving

With our patented Puraglaze and Purashield antibacterial coatings, your ceramics will always be fresh and clean before and after each use.

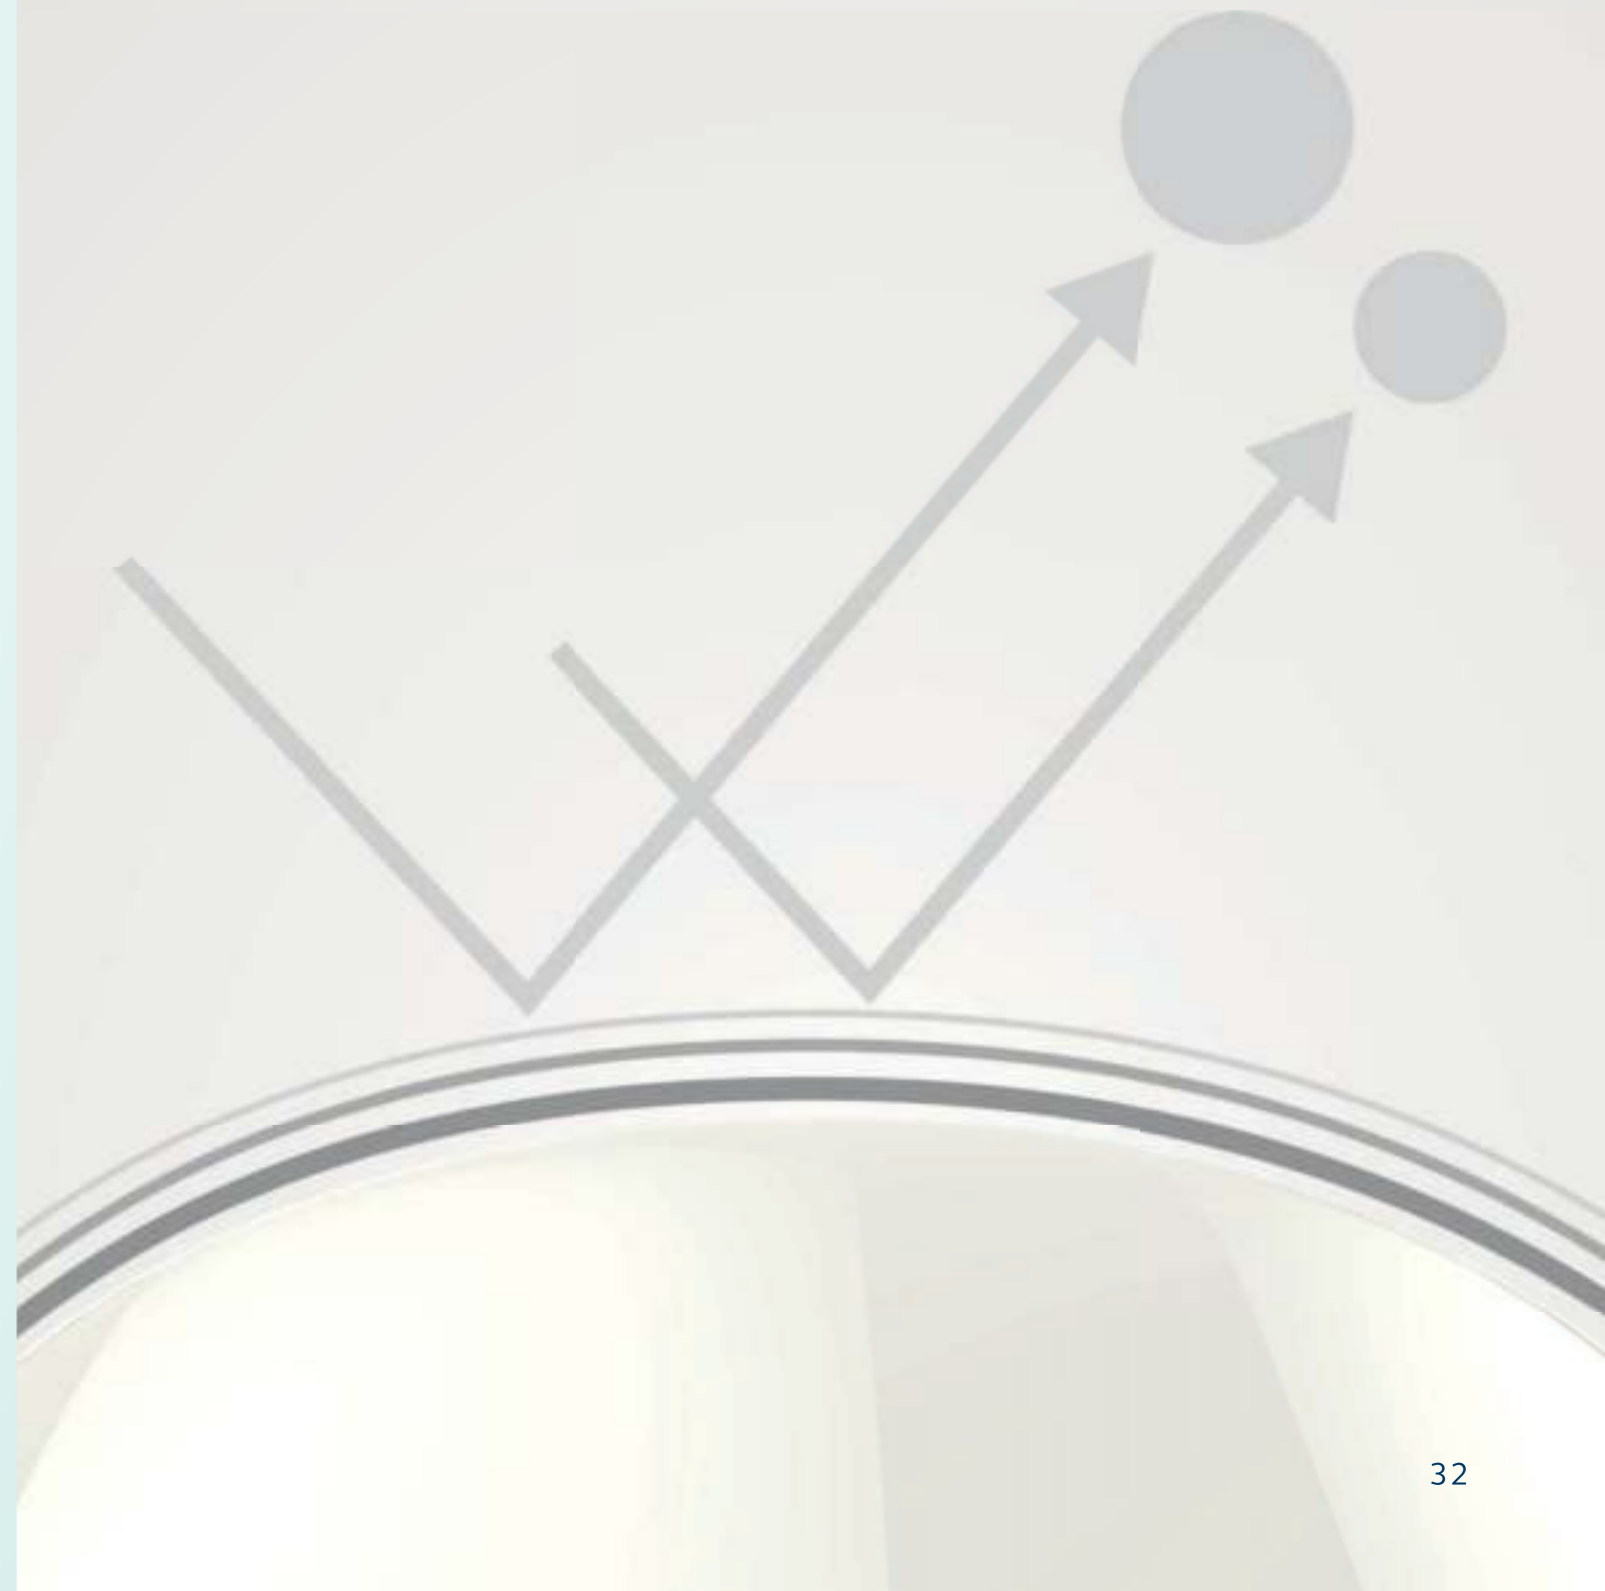

## Puraglaze.

All of our products are coated with Puraglaze technology, reducing dirt and stain accumulation using an advanced hydrophilic formula

## Purashield.

Our higher end products are coated with Purashield, a powerful anti-bacterial coating that kills over 99% of germs.

# SmartSense

## SafeLiving

Our Smartsense technology is highly accurate, stable and more reliable than traditional sensor tech, ensuring a reliable and consistent washroom experience.

Day

Night

Smartsense technology is effective even in alternative lighting conditions.

## Stable and Reliable.

consistent input, consistent output. Smartsense products all tested extensively to be reliable, ensuring you have a consistent washroom experience.

## Pinpoint accuracy.

Smartsense is precise and accurate, even to the fingertip.

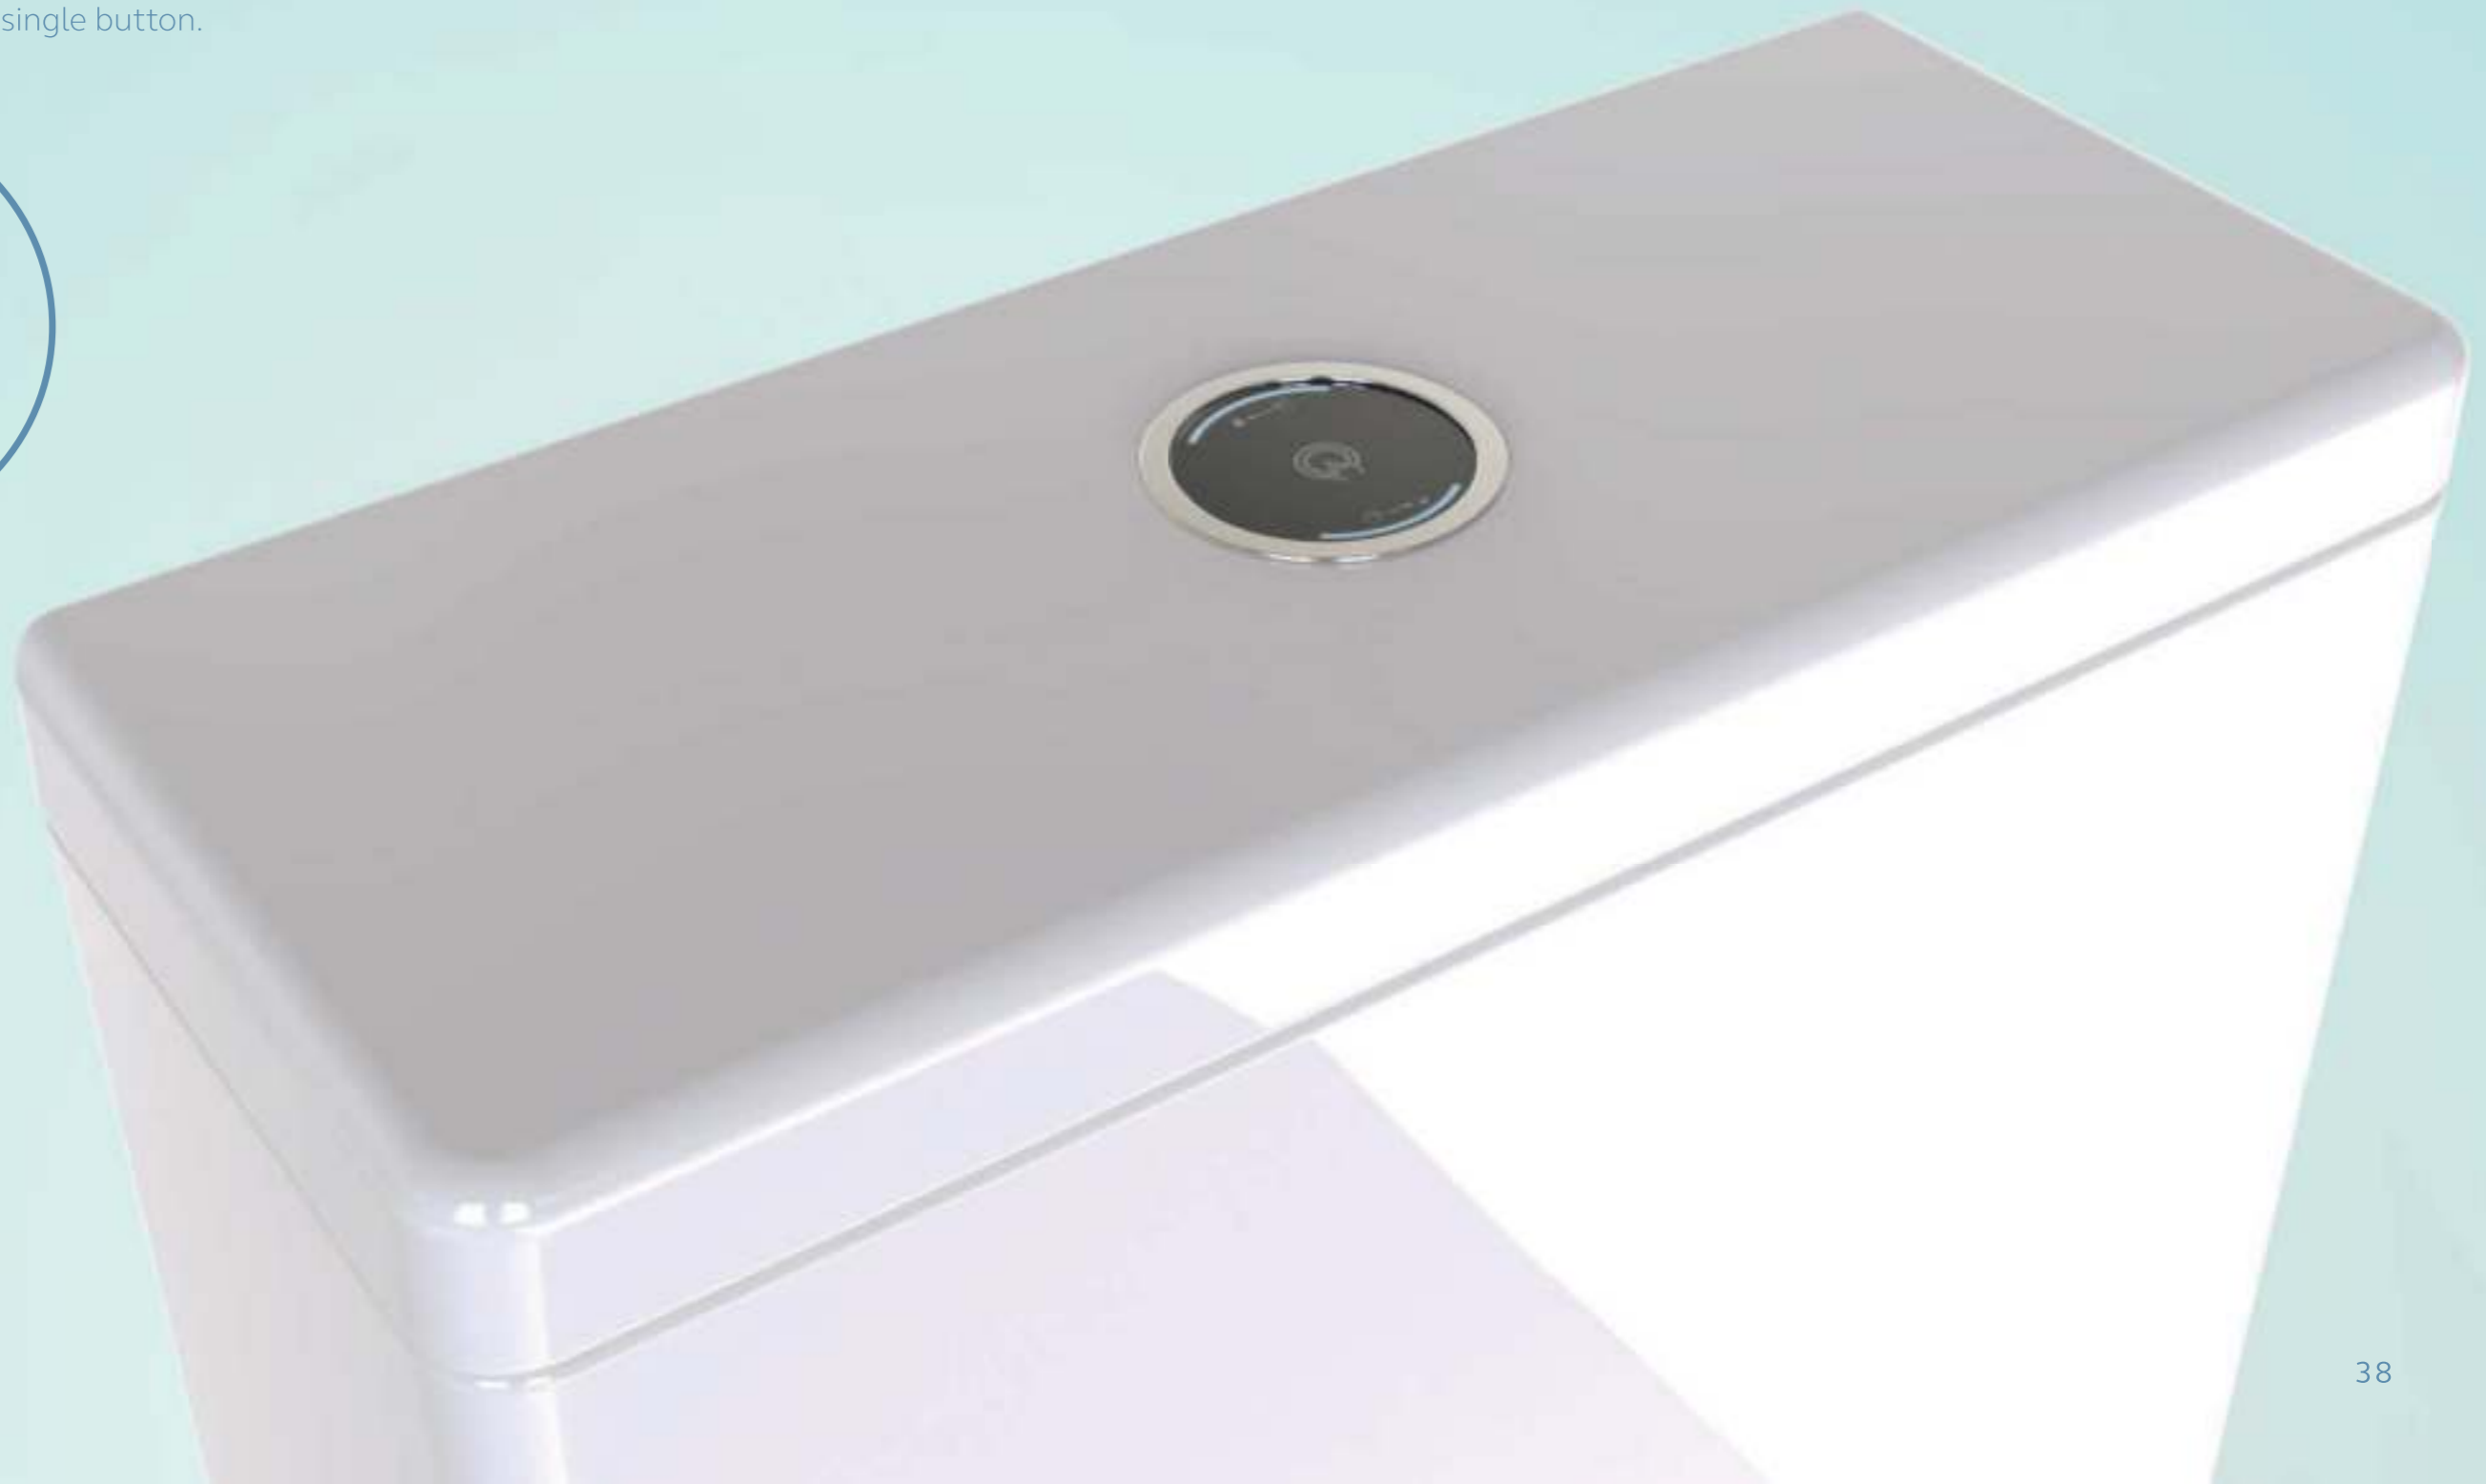

# Wavesense

SustainableLiving

Wavesense offers gestural controlled flushing, adaptable to fit a large number of toilet models, giving you greater control over your flushing without having to press a single button.

# Gesture activated.

Wavesense activates half or reduced flush controls depending on direction of swipe.

Swipe right for reduced flush.

Swipe left for full flush.

# Adaptable.

Wavesense is standard sized, allowing it to be compatible in any number of old or new WC models.

# Manual Activation.

The sensor also serves as an additional, manual button for flushing in the event of sensor malfunction.

# Bird Eye Sense Flush Valve

## RESOURCEFUL FEATURES:

- Both Auto IR sensor and Wave sensor
- Able to set pre-flush volume timing at 8/16/24 hours via remote control
- After using the Wave sensor mode, Auto sensor resumes once user moves away from sensing range
- Wave sensor to activate immediate flushing
- Wave sensing is set to respond within 5cm
- Powered by AC and / or battery

# Commercial Fittings

- SENSOR TAP
- SENSOR SOAP DISPENSER
- MANUAL SOAP DISPENSER
- SELF-CLOSING TAP

# PVD Taps

A bold statement for modern city dwellers by injecting extravagant color, adding character to the modern bathroom space.

These fine quality fittings finishes are fabricated from PVD processes that result in long-lasting anti-fingerprint surface, ensuring ease of maintenance while achieving aesthetic excellence.

# Bubble Effect Sensor Tap

## TECHNOLOGY

By mixing air with water with our carefully designed adaptor, we enhance water flow and feel without increasing the volume of water used, ensuring the best experience at no added resource consumption.

## RESOURCEFUL FEATURES:

- Water conservation with 2L/minute aerated flow
- Reduction in splashing with water aeration
- Increased sensitivity and accuracy with sensor placement at water outlet

## OPTIONAL FEATURES:

- Hydropower operation for energy conservation
- Self-diagnostic alert tone for battery replacement
- Extended battery lifespan

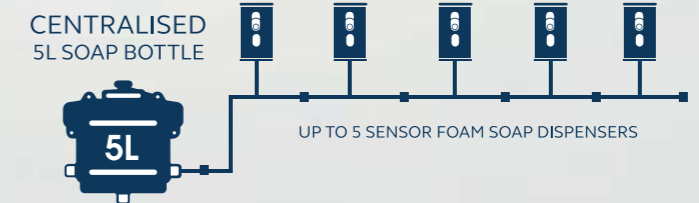

# Centralised Foam Soap Dispensing System

With a streamlined process, we save 80% of time for refilling while reducing soap and water usage. Our centralised system of dispensing foam soap is a green innovation with cost efficiency.

RESOURCEFUL FEATURES:

- Convenience of refilling one soap container for up to five dispensers.
- Reduction of soap consumption with foam that washes off more easily.
- Cost saving with 10% less water usage by replacing liquid soaps with foam dispensing.
