Introduction of Royal American Wholesale

COMPANY HISTORY

Royal American Wholesale is the American branch of Royal Group Manufacturing. Royal Group is one of the largest porcelain tile and quartz producers in Vietnam, with over 22 years of experience in the industry. Royal American Wholesale was formed in August of 2020, with the intention of offering retail stores and contractors Royal Group products.

VISION

To become the leading Provider in the Porcelain Tile and Quartz Supply chain to businesses all over the United States.

MISSION

Royal American plans to be not only a supplier, but also a partner to all of the companies we are in business with. With the ability to supply current designs, as well as create new designs with our customers, in order to suit their demands and help to grow their businesses.

“IF YOU DECONSTRUCT ITALY,
YOU WILL, IN THE END, SEE A
GRAPEVINE, A TOMATO, AND
A SMALL BOY HAMMERING A
SHARD OF MARBLE.”

Besides elegant marble tiles for customers who adore minimalism, we also have special tile collections.

All collections have a deep connection to Italy and Spain, as these countries have inherited an admirable natural beauty and a classic architectural style.

MODELLO

COLLECTION

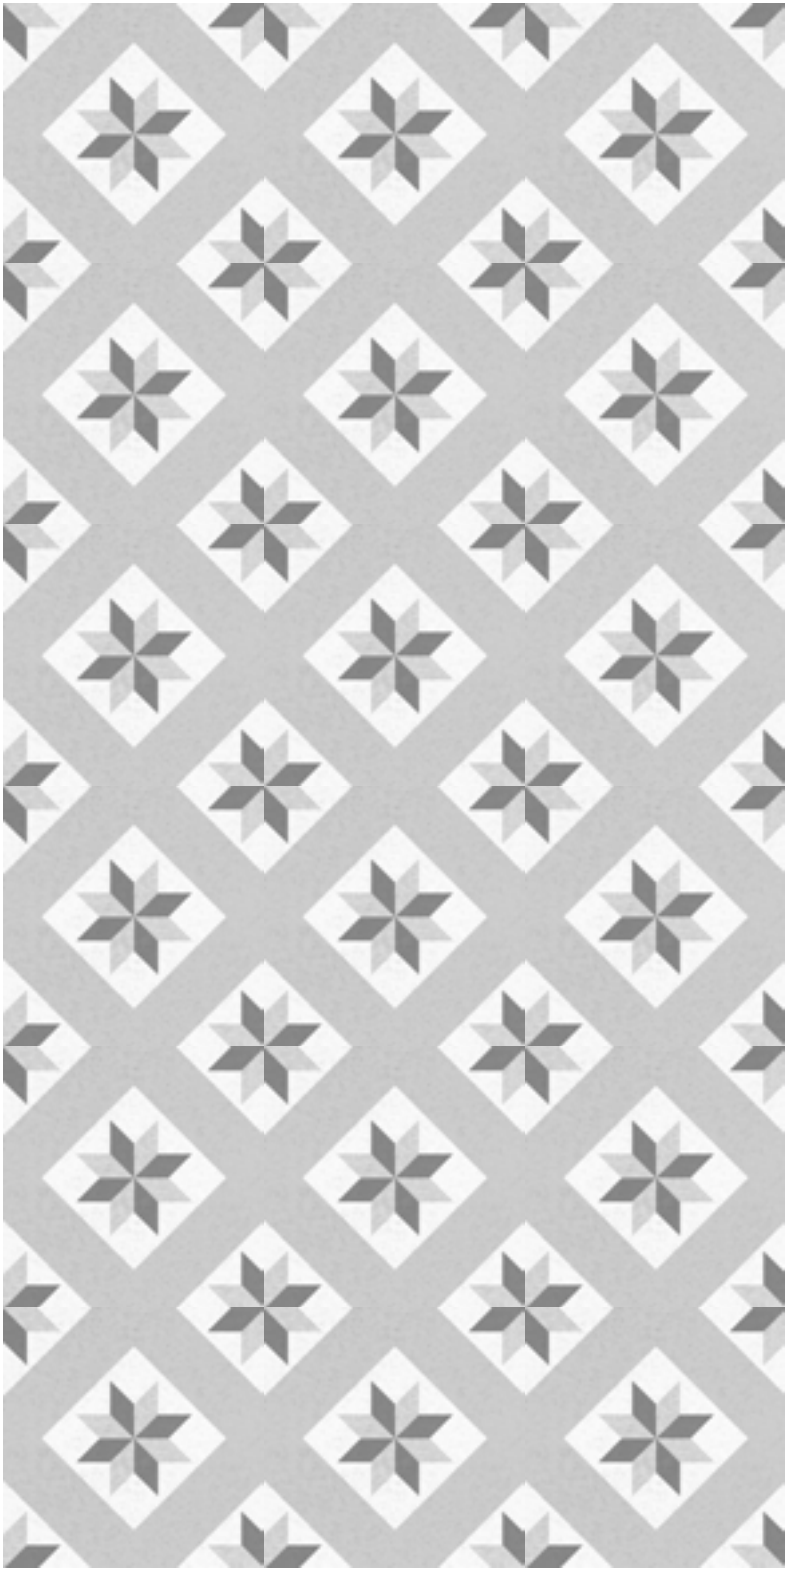

“Modello means “pattern” in Italian. Our collection, Modello, has classical patterns, representing the creativity of Italian and Spanish artisans.

Italian patterns impress customers with their symmetrical shapes and monochromatic color sets and Spanish patterns bring more vibrant colors.

Blur enamel surface combined with impressive patterns helps the collection create a cozy, rustic appearance to architectural works.”

VERONA

COLLECTION

“Verona is a city located in Italy. In Verona, citizens used gravel to pave roads. After a long period of time, these roads automatically became more polished and smooth.

From this idea, the Verona Collection brings customers an delightful design of tiles that looks similar to gravel roads in Italy. Owing to the Lappato effect, the tile surface becomes sparkling and unique but still ensures effective anti-slip qualities.”

ORIGIN

COLLECTION

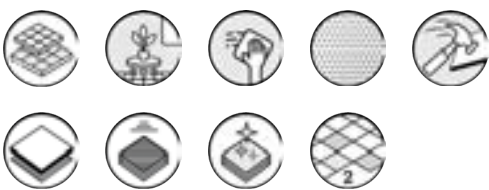

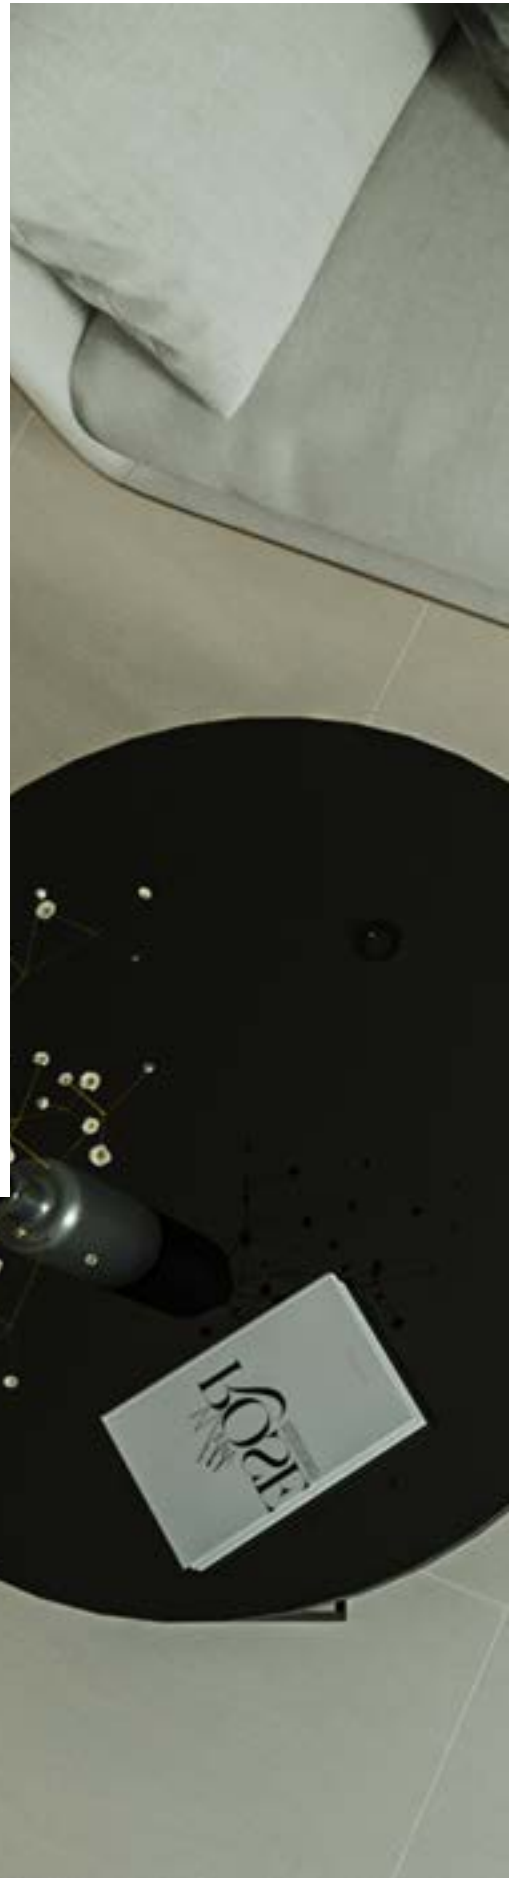

“Using monochromatic colors, combined with a grain coating texture, the Origin Collection creates a special visual experience that reminds us of the origin of life.

When the light is on, the material contrasts between the tile surface and the grain particles shimmer and look sophisticated. Light rays appear on a monochromatic base, with viewers seeing formations of stars out of nowhere.

From the grain coating texture, Origin tiles have better anti-slip qualities and can undergo abrasion better than other tiles.”

GROWTH

COLLECTION

"Thanks to carving effects (carving marks randomly), and the use of colors which are similar to brown, the Growth Collection has a lively rough surface, just like a growing tree.

Using Growth tiles in architectural works will bring a rustic, close-to-nature feeling."

SEDIMENTO

COLLECTION

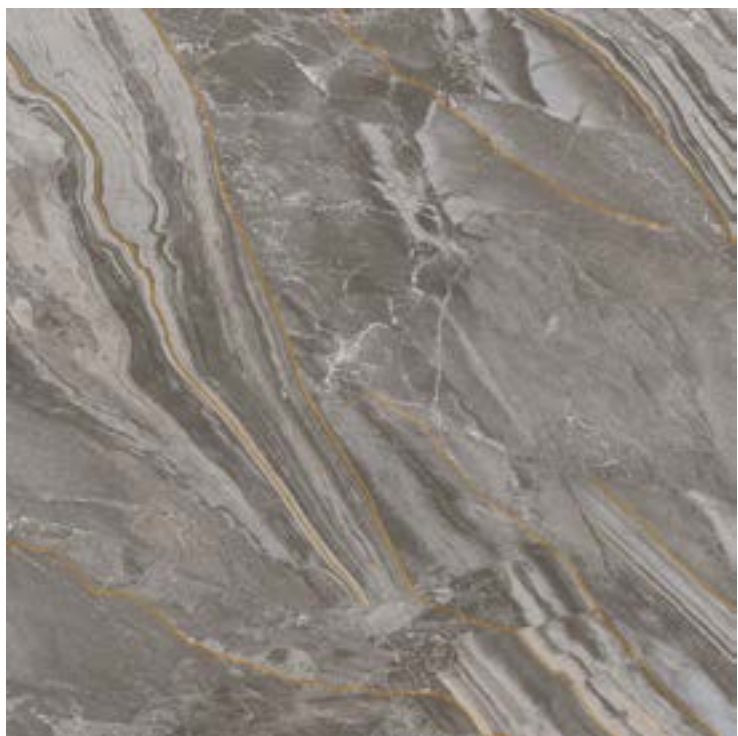

“In Italian, Sedimento means sediment. With this name, our collection illustrates the precious sediment which retains great amounts of gold, as a result of the needle engraving technology.

Thus there are many colors, with every tile from this collection luxurious because of the dense gold vein, representing our desire for a wealthy life.”

SIERRA NEVADA

COLLECTION

“The Sierra Nevada is a snowy mountain range in Spain. Three tiles from our collection represent the different surfaces of each mountain layer on the way to reaching the top of this mountain.

A blur enamel surface combined with the reflective glossy grain finish make the Sierra Nevada Collection exude the beauty of breathtaking nature.”

CARE & MAINTENANCE

DO

- Keep tiles looking good by basic cleaning with warm water and mild soap
- Allow to use multipurpose spray cleaner to remove soap scum, hard water deposits and mildew
- Always dry your porcelain thoroughly after cleaning.
- Cover furniture and table legs with protectors to prevent scratching
- Also choose products which are compatible with your grout to avoid damage

DON'T

- Exposed porcelain to permanent inks or dyes
- Use cleaning products containing acids or ammonia,..(other harsh chemicals)
- Clean glazed tile with oil-based cleaners
- Expose porcelain to permanent inks or dyes
- Force or pressure on products for enduring stability.
