

Beanbag Cool

Stay cool, simple

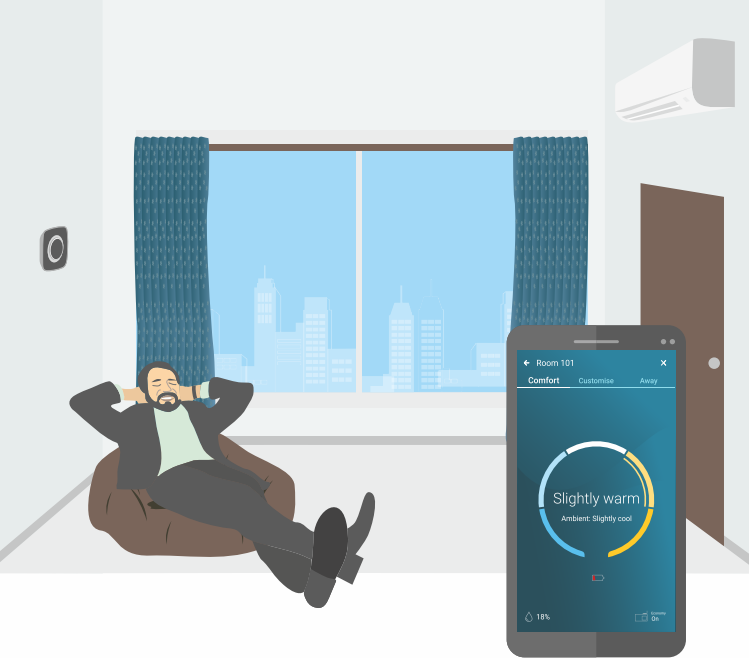

Many **factors** affect **comfort**.

Today air-conditioners respond to **temperature**.

Upgrade your
cooling system
to comfort control.

Maintaining a comfortable climate in our living and work space is important for health and well-being.

With the help of inbuilt logic and appropriately placed sensors, Beanbag Cool adjusts air-conditioners to changes in sunlight, humidity, air-flow and other climatic conditions automatically, and responds to user-activities in real-time.

The need to keep on visiting and adjusting individual air-conditioners, and taking a guess about the most appropriate temperature-setting required to deliver thermal comfort, is history.

With Beanbag Cool in control, arriving home to a stifling-hot house or a stuffy hotel room is not going to happen.

“Did you know heating or cooling buildings currently accounts for more than 50% of the world's energy consumption?”

Wasteful energy use due to overcooling and unnecessary cooling is both expensive and negligent.

Beanbag-cool supports new and existing systems to deliver optimal cooling comfort, simply and efficiently.

When premises are unoccupied, an economical 'away mode' helps home-owners and building managers to take care of their assets and ensures occupants are always met with a comfortable welcome.

Online services connect building-owners and managers to dispersed cooling systems, anytime, anywhere. Beanbag-cool cuts out a lot of hassle, avoids wasting energy or money, and significantly reduces management costs.

Simplify life - manage multiple ACs smartly

Beanbag-cool's user-friendly app dramatically simplifies the management of cooling systems.

Multiple cooling systems can be managed from a single control-point, anytime, anywhere.

Gone are the days of manual intervention and fiddling around with each unit's controls. A locked, unoccupied hotel room or serviced apartment with an AC left on, no longer presents a problem.

Our solution is quick and easy to install. Its use is intuitive and ensures healthy and comfortable cooling is maintained at all times throughout a home or building, or in multiple properties, simply and efficiently.

Secure draws on broad experience and cutting-edge research, that deliver simple solutions to save energy, save money and increase the comfort of our customers.

Like most of the products and services we have developed over the last three decades, **Beanbag is a game changer.**
