Digital Locker Lock

Digital Locker Lock

Unlock Way:

- 1, Single unlocking method: Password or card
- 2, Double unlocking method: Password + card

Working Mode:

- 1, Private mode: the lock keep closed, read card or input password to unlock; the card and password are permanent.
- 2, Publock mode: the lock keep open, read any card or input any password to lock it. then use the same card and password to unlock it. Then they are useless. The card and password are one-time use.
