KM 6839, KM 6639 - Installation in tiled and solid worktops (Installation drawing)

1. Worktop
2. Cooktop
3. Gap
4. Casing depth
5. Wooden frame, 13 mm (not included)

### Installation instructions:

Flush hobs are designed for installation in natural stone (granite, marble), solid wood and tiled worktops. Please enquire with manufacturer regarding worktops made from other materials.

The minimum clear width of the base unit has to be at least as wide as the worktop cut-out to ensure that after installation the hob is accessible from below, and the chassis can be removed for servicing.

As the ceramic glass screen and the worktop cut-out are subject to certain dimensional tolerances, joint widths can vary (min. 1 mm).
