Connect your next call with the Targus® Wired Stereo Headset and help increase productivity and comfortability without cradling a phone or fussing with the muffled sound of your laptop microphone. Whether you're videoconferencing with the department or collaborating with a co-worker, taking calls with a headset allows you to use your computer, take notes, or multi-task if necessary.

With an adjustable padded headband and soft touch ear pads, this headset offers a comfortable, secure fit for all day wear. The rotatable, omni-directional boom microphone allows you to find optimal mic placement to provide clear sound quality for your listener and the dual over-ear speakers enhance incoming sound while helping block out the noise around you. Equipped with noise-canceling technology, this headset filters ambient noise and provides better speech clarity. And this stereo headset isn't just for calls, it can be used to listen to music for a full immersion experience at work or at play. Bonus: Volume control is built right into the cord so there's no need to take your headset off to adjust the sound.
